

# PARKETOLIT

ONE COMPONENT POLYURETHANE PRIMER

# PR51

**FAST - SOLVENT-FREE - READY TO USE**

## Fields of application:

- **Strengthening** of powdery and non compact surfaces
- **Balance absorbency** of too porous subfloors
- **Impregnating heated subfloors** with residual moisture content till 3CM%
- **Impregnating the wet cement subfloors** with residual moisture content till 4CM%
- **Renovating the old parquet surface** without parquet removing

Up to 50% lower spreading quantity comparing with solvent primers

After using primer PARKETOLIT PR51, adhesives PARKETOLIT 1549, PARKETOLIT 1550, PARKETOLIT E60 or PARKETOLIT E65 can be used.

## Benefits of using primer PARKETOLIT PR51:

- **100% active substance.**
- **Odour less**, solvent-free.
- **Ready to use**, one component, without diluting.
- **Up to 50% lower consumption**; only one coat to strengthen the surface and two coats to impregnate the wet cement subfloors are sufficient.
- **Fast hardening** primer allows flooring installation already **45 to 90 minutes** after coating, and laying of parquet on wet screed already **in one day**.
- **Without material waste**, due to mixing too much product.

## Packing:

Plastic vessels of 5L:

- For strengthen of powdery and porous surfaces: 25 – 70 m<sup>2</sup> (70 – 200 mL/m<sup>2</sup>)
- For impregnate the wet cement floors till 4CM%: 18 – 35 m<sup>2</sup> (140 -270 mL/m<sup>2</sup>)

# WE'RE ALWAYS IN BETWEEN

## Benefits of using primer:

Before laying floor coverings, the cement surface should be coated with primer in order to:

- Improve hardness of powdery and non compact subfloor

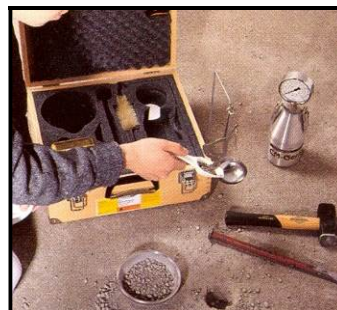

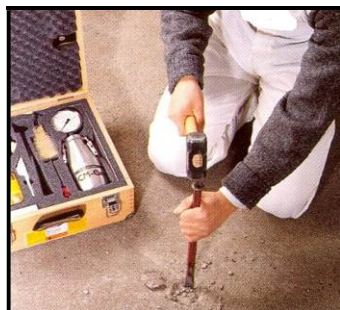

- Balance absorbency of too porous subfloors

- Improve the glue adhesion to surface

- Allow the laying of parquet on cement screeds with increasing moisture content till 4CM% and save the time needed for laying wooden floors
