

“Our products will hold the world together.”

Our vision means that we strive to build a company that makes amazing products. Products that are able to satisfy the needs of our customers and allow them to achieve their goals. And since most of our production is in the field of adhesives, we believe our products can and will hold the world together – literally and figuratively.

Our mission explains it even more:

“We are connecting our ideas, expertise and people to make top quality products, developed for our customers, to enable them to combine their ideas with their solutions.”

All our activities are guided by our main values:

 OPENNESS We're open-minded to new ideas, forward thinking when searching for solutions to your problems and openhearted when talking with you.	 EFFECTIVENESS Developing products with highest standards, top quality of processes, excellence in performance, and precision of timing and delivering.	 CONNECTION We work together with our customers and hold together as a team – as strong as anything glued with our products.	 COMMITMENT We are committed to providing best solutions to our customers. Committed to achieving our goals and to developing the best company and working environment for everybody at MITOL.	 RESPONSIBILITY Towards owners, towards our customers and towards our people, always respecting nature, committed to the environment and our planet.

MITOL for today and tomorrow

In the heart of our efforts are more than just great products and more than just satisfied customers; we also want to build amazing working environment for our employees, enabling them to fulfil their career aspirations and to develop professionally and personally. And while doing that, we pay enormous respect to the environment around us, our planet and our society.

ENVIRONMENTAL RESPONSIBILITY

The protection of the living environment is the fundamental condition for healthy and sustainable development of an organization. MITOL has been paying special attention to the selection of materials and production processes that do not burden the environment. Our efforts for environmentally acceptable and safe production are also confirmed by standard certifications.

SOCIAL RESPONSIBILITY

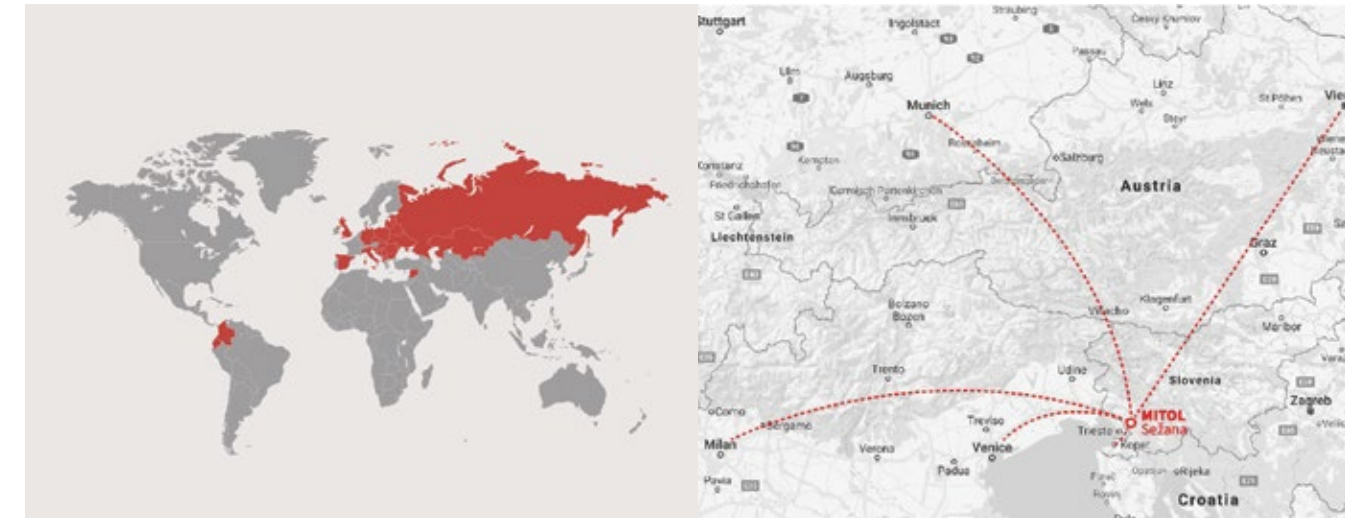

The company's success and its results depend to a great extent on the knowledge and skills of its employees, which requires continuous upgrading and development of knowledge and competence in many fields. We follow the highest ethical principles and reinforce them with our employees through our company's code. We mentor and motivate our employees to adopt the best practices and innovative approaches with integrity driven thirst for knowledge.

MITOL, always in between

With over 70 years of tradition, MITOL is one of the most important European producers of adhesives. With our line of more than 500 high-quality products, we are able to satisfy even the most demanding customers. We are one of the few adhesive producers with own production of emulsions. This gives us higher flexibility in developing new products and enables our flexible price policy. The secret to our success are tailor-made solutions for our customers, created in line with customers' needs.

With our high performance and price-competitive products, we have created a modern and internationally successful company. Since 2017, MITOL has been a proud member of Soudal group with partners in 37 countries all over the world.

We take pride in saying: **We are always in between.**

In the heart of Europe

MITOL's home is Slovenia, a beautiful country in the middle of Europe. With our amazing strategical and logistical position, we are always able to satisfy our customers' needs fast, and are able to offer all the necessary support.

More than that: as Slovenia is one of the greenest countries in Europe, we care enormously for our environment, always searching for solutions that respect the nature and have the least impact on the environment.
